

Are You Ready to Transform Child Nutrition Program Administration?

Bridging Gaps and Reimagining Solutions with Neotrient

Understanding the Key Challenges in Child Nutrition Program Administration

18%

Many child nutrition programs face increasing demand, with **18% of households reporting challenges in providing enough food for their children.**¹

3.2 M [↑]

In the past year, **3.2 million more people experience food insecurity and relied on child nutrition programs**, highlighting the growing operational burden on these systems.²

42.1 M

In 2023, **42.1 million people benefited from USDA programs**, underscoring the critical role of effective program administration.³

17.5% [↑]

Research shows that **fed students achieve 17.5% higher scores on standardized tests**, demonstrating the direct educational and developmental benefits of well-administered nutrition programs.⁴

Hard-to-Access

Families supported by these programs often face tough choices, emphasizing the **importance of simple-to-access program benefits and streamlined operations.**

Common Challenges Facing these Organizations

Organizations face many obstacles while trying to reduce food insecurity. Some of the most common challenges include:

Staff shortages lead to skill gaps, including software expertise.

Antiquated software struggles to adapt or grow with your program needs.

Rising costs lead to shortfalls and program cuts.

Changing USDA regulations and changing guidelines causes compliance and operational headaches.

Organizations Committed to Change

Government agencies, schools, and **many organizations are dedicated to reducing food insecurity and ensuring access to nutritious meals.**

USDA programs like the **National School Lunch Program (NSLP)** and **School Breakfast Program (SBP)** provide support to millions of children.

Organizations administering these programs often encounter **operational and technical challenges** in meeting their mission effectively.

The right technology partner can provide essential support to maximize their impact in combating food insecurity.

Introducing Neotrient

Neotrient is a SaaS platform transforming USDA child nutrition program administration. The platform is built by industry experts with decades of experience in nutrition program administration.

Advantages of Neotrient

- Platform Configurability
- Modern and User-Friendly UI/UX
- Reduced Cost of Total Ownership
- Workflow Integration
- Web-based, Data Secure Platform
- Regulatory Compliance Adaptability

Features of Neotrient

Domain Features

- Process-Driven User Experience
- Error Reduction
- Smart Enrollment Processes
- Claim Submission Review
- Caseload Management
- Sponsor Communication
- Reimbursement Improvements
- Resource Optimization
- Community and Support
- Training and User Assistance

Technology Features

- Form Configuration
- Secure, Web-Based SaaS Model
- Rapid Deployment
- Accessibility Friendly
- Modern UX/UI Layout
- Data Migration Options
- Continuous Updates
- Intuitive User Platform
- Obsolescence Prevention
- Scalable and No-Code Platform

Curious to know more about how Neotrient could solve your agency's challenges? Contact Michael Dun at michael.dun@sagitec.com for more information.

About Sagitec

Sagitec is a leading software platform and solutions provider that serves clients focused on solving complex, business-rule-driven problems. Our platform powers transformative solutions for USDA Child Nutrition programs, enabling state agencies to modernize operations, enhance compliance, and deliver scalable solutions. With deep industry and domain experience in Pension, Labor & Employment and Healthcare software implementation and systems integration, Sagitec is a partner that clients have trusted for over 20 years to drive their vision into action.
